Swaccha Bharat Mission 2.0

Details about SGVS expert sharing in meeting

1. E -water collection centers and scientific disposal and dismantling for environment safety. We have established one center at Pimpri Chinchwad Municipal Corporation (PCMC) in collaboration with Greenscape Private limited at Bhosari MIDC. Environment Conservation Association is in our association for the same project.
2. We are working on separation of garbage in two categories i.e Dry and wet garbage. We are doing wet garbage decomposition at the society level. VUPOWN Society, Kiwale, Pune.
3. Grey and black water management is crucial issues and have significant impact on Urban River ecosystems like Mula, Mutha, Indrayani and Pawana rivers in Pune and Pimpri Chinchwad cities. We have carried out a survey for STP and ETP's in Industrial set ups with experts and found that maximum STP and ETP's are not in functioning.
4. Diseases are uncommon and seasonal changes boost its severity. Dengue is one of the serious threat urban populations in some last year due to pollution and solid waste.
5. Rainwater harvesting on municipal corporations, government apartments, malls ZP schools in need to be mandatory for enrich urban ground water levels.
6. Training and capacity building for the stakeholders,
We have started for,
 - Swachhagrahi- Appointed by Municipal Corporation
 - NSS volunteers- involved in plastic collection waste drives. This workforce is great resource Under SBM 2.0
 - Establishment of Eco/ Environment Clubs under SBM 2.0 at Schools and Colleges
 - Training at Society level has fruitful outcomes.
7. Riparian portions of the rivers (from both side of Bank) for 300 meters should be utilized for greenery to prevent soil erosion.
8. We are focusing on the legal issues about black and grey water management in between Contractor and flat or society holder.
9. Municipal Corporation is thinking of sludge drying beds for human excreta at society level but infrastructure and treatment requiring open space is crucial issues. Whereas odor from sludge may be became the cause of conflict between society and corporations.
10. Training and capacity building for stakeholders such as Health officers, Solid waste pickers, Segregators, Door to door collectors, Hawkers, Scrap vendors etc. must be mandatory for better implementation of SBM 2.0
11. Urban forestry concept (Miyawaki Method) is great to resolve the issues of poor air quality.
